Super Concentrate Fuel Supplement

PRODUCT DESCRIPTION:

CleanBoost® Maxx™ Is a super concentrate combustion improver, specially formulated to maximize both performance and fuel economy. Enjoy the extra horsepower and increase in fuel economy. Clean Boost Maxx™ will allow your fleet to save operating costs by reducing emissions, increasing fuel economy and providing cleaner running equipment.

CleanBoost® Maxx™ Can be used with # 1, # 2 diesel and gasoline at a ratio of 1:4000 dramatically reducing the carbon particulate emissions while simultaneously reducing the excess air requirements.

CleanBoost® Maxx™ Will increase combustion efficiency by reducing fouling and corrosion thereby improving heat transfer, extending equipment life, reducing maintenance costs and minimizing interruptions of equipment operations.

CleanBoost® Maxx™ Environmental benefits all types of combustion applications by promoting the combustion of the carbon particles (soot) and condensed tar from the incomplete combustion of untreated fuels.

Applications:

CleanBoost® Maxx™ Is effective in industrial boilers and diesel engines of all sizes and is used in marine shipping, power generation, mining, construction, ground transportation and wherever high fuel prices or compliance with emissions or opacity regulations is a concern.

BENEFITS:

CleanBoost® Maxx™ Can be used with all grades of diesel fuel, JP8, kerosene and gasoline. Fuel treatment includes better engine performance, extended equipment life and reduced maintenance costs.

CleanBoost® Maxx™ Reduces fuel consumption by 3 to 5% across a wide range of fossil fuels.

CleanBoost® Maxx™ Reduces greenhouse gas (CO₂), acid rain gases (SO₂ and SO₃), soot (black smoke), carbon build-up, fouling, slagging and cold-end Corrosion. **All are reduced.**
